Question 1
Fill in the blank: A security _____ is a set of guidelines used for building plans to help mitigate risk and threats to data and privacy. 1 / 1 point

regulation
control
framework
lifecycle

Correct
Security frameworks are guidelines used for building plans to help mitigate risk and threats to data and privacy.

Question 2
An organization requires its employees to complete a new data privacy training program each year to reduce the risk of a data breach. What is this training requirement an example of? 1 / 1 point

Cybersecurity Framework (CSF)
Personally identifiable information (PII)
Security control
Data confidentiality

Correct
Security controls are safeguards designed to reduce specific security risks.

Question 3
What is a foundational model that informs how organizations consider risk when setting up systems and security policies? 1 / 1 point

General Data Protection Regulation law (GDPR)
Confidentiality, integrity, and availability (CIA) triad
Sensitive personally identifiable information (SPII)
Cybersecurity Framework (CSF)
Correct
The CIA triad is a foundational model that helps inform how organizations consider risk when setting up systems and security policies.

Question 4
Security teams use the NIST Cybersecurity Framework (CSF) as a baseline to manage short and long-term risk. 1 / 1 point
True
False
Correct
Security teams use the NIST CSF as a baseline to manage short and long-term risk. The CSF is a voluntary framework that consists of standards, guidelines, and best practices to manage cybersecurity risk.
